Water Shutdown Notice

We will be completing installation of the Permanent Water valves at the Intersection of Maple Street and Sargent Street on Thursday May 15, 2025. The anticipated water shut down is expected to be an isolated impact to 21, 23, 26, and 28 Maple Street, however some additional residents may experience the shutdown if the Town is unable to isolate shutting off the existing water main.

Water is anticipated to be shut off between the hours of 8AM to 5PM. We thank you for your patience as work progresses on this project.

For project information please visit the Town of Hanover Website Hanovernh.org.
