Traffic Delays Sargent Street

We will be completing installation of new water mains on Sargent Street starting Wednesday June 11th until approximately June 18th. The new main crosses the roadway in a few locations and will impact traffic to and from your residences. At times there could be long delays.

We recommend, if you need to leave throughout the day to park elsewhere while this work is underway. At times work on this street will limit our ability to maintain one lane of traffic and there could be several hours where you will not be able to enter or exit.

The Town will provide parking passes if requested at the Town Lot on Maple Street. If you wish to request a parking pass, please contact Michael Schibuola or Christopher Swain 603-640-3220.

For project information please visit the Town of Hanover Website Hanovernh.org.
