Sargent Street Closures/Delays/Service Connections

We will be completing installation of new water services crossing the Road June 26th to July 1st to complete the final connections to the new system. This will restrict travel at each roadway crossing for several hours and through traffic will not be likely at times. During this work at your property, your water will be shut off for an estimated timeframe of 1 hour per house to make the final connections to the new main.

We recommend, if you need to leave throughout the day to park elsewhere while this work is underway. Please feel free to communicate with our crew on-site.

The Town will provide parking passes if requested at the Town Lot on Maple Street. If you wish to request a parking pass, please contact Michael Schibuola or Christopher Swain 603-640-3220.

For project information please visit the Town of Hanover Website Hanovernh.org.

Capital Water Distribution Replacement and Rehabilitation
